ABRAHAM GETACHEW

ERP Techno-Functional Consultant | Software Engineer | AI & Data Science

Addis Ababa, Megenagna | 0943941897 | abrahamgetachew4384@gmail.com | LinkedIn

Qiyas ID: **qiyas-2026-001212**

SUMMARY

ERP Techno-Functional Consultant and ERP Solution Engineer with hands-on experience delivering end-to-end Odoo ERP implementations, business process analysis, requirements gathering, system configuration, customization, workflow automation, API integration, UAT, user training, deployment, and post-implementation support. Experienced across Accounting, Sales, CRM, Purchase, Inventory, HR & Payroll, Project, Manufacturing, and Quality, with technical expertise in Python, XML, PostgreSQL, JavaScript, and React.

Complements ERP expertise with practical capabilities in Artificial Intelligence, Machine Learning, Data Science, and Data Analytics, including Python, SQL, Pandas, NumPy, Scikit-learn, TensorFlow/Keras, data preprocessing, EDA, statistical analysis, data visualization, predictive modeling, NLP, and computer vision. Recently completed QIYAS Advanced Digital Skills Training in AI, Data Science, and Data Intelligence, supported by hands-on projects in machine learning, NLP, and computer vision. Combines business process knowledge, ERP engineering, software development, and AI/data capabilities to build practical, scalable, data-driven enterprise solutions.

EXPERIENCE

ZE-Tech IT Solutions and Services — Present

Software Engineer (Remote)

- Design, develop, and maintain scalable software applications and enterprise solutions using modern software engineering practices.
- Develop and customize Odoo ERP modules, automate business workflows, integrate APIs, and support ERP implementation projects.
- Build full-stack web applications using Python, JavaScript, React, PostgreSQL, SQL, XML, HTML, and CSS.
- Develop AI and data-driven solutions using Machine Learning, Data Science, and Artificial Intelligence techniques.
- Analyze, clean, and transform data to generate actionable insights that support business decision-making.
- Collaborate with cross-functional teams to gather requirements, deliver high-quality software solutions, and ensure successful deployment; perform testing, debugging, optimization, technical documentation, user training, and post-deployment support.

EASE Engineering — Remote

ERP Business Analyst

- Analyzed business requirements and implemented Odoo ERP across a multi-company environment covering four ventures.
- Designed and configured workflows across Accounting, Sales, Inventory, HR, Procurement, and Projects; bridged business and technical teams through requirements analysis, system configuration, testing, troubleshooting, and process optimization.
- Supported ERP automation, documentation, user training, and digital transformation initiatives.

Ashewa Technology — Nov 2025 – June 2026

Techno-Functional Consultant / Odoo Developer

Led end-to-end Odoo ERP implementations, including requirement gathering, gap analysis, system design, configuration, customization, testing, and deployment, ensuring alignment with client business objectives.

- Successfully delivered 5+ ERP projects through technical consulting and application development across Accounting, Sales, CRM, Inventory, Purchase, Manufacturing, HR, and Payroll, as well as custom-built modules for unique operational needs.
- Designed and developed custom Odoo modules using Python, XML, and PostgreSQL, automating complex workflows and improving business process efficiency.
- Conducted in-depth functional analysis workshops with stakeholders to translate business requirements into scalable, sustainable technical solutions.

- Customized and extended core Odoo modules to enhance functionality, improve usability, and ensure seamless integration across departments.
- Performed database design, optimization, and advanced SQL querying, improving system performance, reporting accuracy, and data consistency.
- Developed and integrated RESTful APIs for third-party systems using Python, ensuring cross-platform compatibility and seamless data exchange.
- Built responsive, user-friendly frontend components using React, enhancing system usability and user experience.
- Prepared functional documentation, technical specifications, and user manuals to support implementation and knowledge transfer.
- Led and facilitated User Acceptance Testing (UAT) sessions, ensuring solutions met business requirements and quality standards.
- Provided post-go-live support, including troubleshooting, performance tuning, bug fixing, and continuous system improvement.
- Collaborated with developers, project managers, and client stakeholders to deliver projects on time and within scope.

Top Technology
Odoo Functional Consultant

- Configured core Odoo modules — Sales, Inventory, Accounting, and CRM — tailoring system functionality to client-specific business processes.
- Served as technical consultant, gathering and analyzing user requirements through workshops and interviews and creating detailed functional specifications.
- Conducted user training and comprehensive UAT sessions, ensuring system readiness before go-live.
- Collaborated with developers across Windows and Unix environments to troubleshoot functional issues, achieving a 15% increase in data accuracy across key workflows.
- Provided post-implementation support and application development guidance, quickly resolving user-reported issues and ensuring system adoption.

Ethiopian Hackathon
Front-End Developer & Team Leader

- Led a small development team in the rapid design and deployment of an innovative web-based prototype during the hackathon.
- Developed a responsive user interface using HTML, CSS, JavaScript, and React, demonstrating technical creativity under pressure.
- Coordinated project tasks and deadlines, ensuring effective team collaboration and on-time delivery.
- Presented the final working prototype to judges, demonstrating technical and leadership capabilities.

Hagerkn Ewoke Club
Vice President

- Managed organizational activities and event planning, enhancing community engagement and promoting the organization's mission.
- Assisted in strategic decision-making and project execution, supporting successful completion of community initiatives; led and motivated a team of members, fostering strong internal collaboration.

EDUCATION

Addis Ababa University, School of Commerce
Bachelor's Degree, Business Administration and Information Systems

PROFESSIONAL TRAINING & DEVELOPMENT

QIYAS Advanced Digital Skills Training — AI, Data Science & Data Intelligence
Training Period: May 2026 – September 2026
Key Areas: Artificial Intelligence, Machine Learning, Data Science, Data Analytics, Python, SQL, Data Cleaning & Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis, Data Visualization, Predictive Modeling, NLP, Computer Vision, Deep Learning

Practical Application: Applied the acquired skills through hands-on projects involving machine learning, natural language processing, computer vision, predictive modeling, and data analysis.

SELECTED AI & DATA SCIENCE PROJECTS

- **English–Amharic Neural Machine Translation** Python, TensorFlow, NLP | Developed Seq2Seq LSTM and Attention-based translation models.
- **House Price Prediction** Python, Scikit-learn, Pandas | Built a machine learning model for residential property price prediction.
- **Lung Cancer Detection** CNN, EfficientNetB0, TensorFlow | Classified histopathological images using deep learning.
- **Handwritten Digit Recognition** Python, Deep Learning, Streamlit | Custom neural network; 89.04% test accuracy.
- **Ham & Spam Classification** Python, NLP, Machine Learning | Built an automated text classification pipeline.
- **Credit Default Prediction** Python, LightGBM, SHAP | Developed a credit-risk prediction and model interpretation pipeline.
- **AI Attendance Management** Python, Flask, Computer Vision | Developed facial-recognition-based automated attendance.

SKILLS

Odoo Functional: Module configuration across core business areas (Sales, Inventory, CRM, Accounting), User Acceptance Testing (UAT) & training, functional documentation, full ERP implementation lifecycle

Technical & Analytical: Business analysis & requirements gathering, Python (scripting for Odoo), front-end development (HTML, CSS, JavaScript, React), digital transformation concepts, PostgreSQL, Git/GitHub, technical consulting, application development

AI, ML & Data Science: Machine Learning, Artificial Intelligence, Data Science, Data Analytics, Pandas, NumPy, Scikit-learn, TensorFlow/Keras, LightGBM, NLP, Computer Vision, Data Visualization

Soft Skills & Leadership: Project and team leadership, problem solving & workflow automation, communication & stakeholder management, digital advertising

Technologies: Odoo 16/17/18, Python, PostgreSQL, SQL, XML, JavaScript, React, Git, enterprise operating systems

CERTIFICATIONS & TRAINING

- React.js / Front-End Development Certification
- Leadership & Communication Certifications
- Project Management Coursework
- Financial Modeling & Analysis Certificate
- Business Analysis Certification
- Entrepreneurship / Business Strategy Certificate
- Digital Transformation Training
- Blockchain, Web3 & Smart Contracts Course
- Data Science and Artificial Intelligence (AI) — including Exploratory Data Analysis (EDA)
- Advanced Digital Skills Training — AI, Data Science & Data Intelligence | QIYAS, 2026

LANGUAGES

- English — Proficient
- Amharic — Native
